# III. Trouble shooting

## 1. Radio no signal / no lock / weak signal

- ① Check and connect the radio antenna or radio antenna control cable
- ② Check and install the original car radio antenna
- ③ Drive to open area, not stay at Basement, enclosed garage, tunnel, etc. (The weather affect the radio signal, signal is poor in cloudy)

## 2. Bluetooth function does not match

- ① Restart the phone bluetooth, Remove the previous link data, then match the connection to GPS unit Bluetooth, default Password : "0000". please keep the GPS unit in Bluetooth -on interface in the whole operation

## 3. In reversing, no image/ slow image/ flashing image

- ① Check if the power cable is connected correctly
- ② Check if the reversing control cable is correctly
- ③ Check if the car reversing camera is defetive
- ④ Check if the camera video cable is connected correctly
- ⑤ Vehicle power supply voltage instability A: install the relay (power filter)

## 4. No power on

- ① Check if the power supply B + and ACC are connected, check if the cable is loose, check if the original car fuse or GPS Unit fuse are damaged
- ② The car power instantaneous fluctuations, or mistaken wiring, GPS unit in protection, no booting. A: press the RST/RES on the unit panel.
- ③ GPS unit goes in self-protection mode and cann' t power on because of sudden enormous power fluctuation or incorrect wiring. Answer: Press the RST/RES on the unit panel

## 5.GPS signal Problems

A:Please place the Antenna horizontally, to face the sky, for better signals.Some cars are equipped with explosion-proof membrane, which will reduce the GPS signal reception. Cut off a small explosion-proof membrane above the antenna.

## 6.Steering wheel control keys can not work

A: 1.For cars without Can-bus, enter the steering wheel setting menu in the GPS unit,set correctly,save and exit.

2.for cars with Can-bus,check to see if Can-bus decoder is connected correctly and firmly.Make sure all the pins are not bent.Normally no need to set steering wheel control for this type of cars.

## 7. Bluetooth

A: After the car GPS unit is connected successfully to the smart phone by Bluetooth, music files in the phone can be directly played on the unit. Phone book can be imported to the unit by clicking on one key, this also applies to phone calling and answering.

## 8.How to watch movies and live TV on the unit?

A: Video files can be saved in memory card or SD card and played on the unit .Watching TV requires an optional TV box.Videos and TV programs can also be watched through apps with Internet access.

## 9.Can it work with external driving recorder, amplifier ?

A: Yes, it has front 4 audio output, 1 subwoofer output. and amplifier control line.

## 10. Why no image signal when reversing.

A: Check the connection of reversing control line, and power supply from the reversing light, and camera-in cable. If show black screen, please connect the camera video cable to the AV-IN cable of the Unit, disconnect the reversing control line and turn reversing gear, and press the icon of AV-IN or AUX. if it show image, it should be problem of the unit. if no image, it should be problem of the camera or the video cable.

## 11. What if it does not boot ?

A: Check the power of both the B+ and ACC (yellow and red line). check whether the car insurance is disconnected. check the insurance of the unit.

## 12. How to set the function of steering wheel control ?

A: Click the steering wheel icon, click the reset - click on an icon, and then click the corresponding button on the steering wheel for three seconds, the screen tell learning success, then set all other buttons functions. click Save and Exit.

## 13. Warranty?

A: 1 year warranty, We will provide technical and software support. if any problem, we will send update firmware, or spare part to fix. or you can ship back the unit, we provide maintenance

## 17. About map update

A: The map usually have new update in about half to 1 year. you can contact us to send you a link to download map.

Thank you for buying this product. please read through these instructions so you will know how to operate this unit properly. After you have finished reading the instructions,keep this document in a safe place for future reference.
